METROPOLITAN DIGESTIVE HEALTH - CLINICAL CONSULTATION NOTE

Patient Name: JENKINS, ROBERT DOB: 03/14/1976 (48 yo M) Acc No: 882190
Date of Service: 01/15/2026 Encounter Type: Outpatient Specialist Consultation
Ordering Provider: DAVID MARTINEZ, MD (Gastroenterology)
Facility: Metropolitan Digestive Health Center, Suite 400

History of Present Illness

Patient is a 48-year-old male presenting with acute severe epigastric abdominal pain radiating to the back.
Pain onset was sudden 3 days ago, accompanied by persistent nausea and anorexia.
Pain Scale VAS: 8/10, constant burning and aching quality.
Physical Exam: Significant epigastric tenderness with voluntary guarding. Bowel sounds hypoactive.

Diagnostic and Laboratory Findings

Complete Blood Count: WBC 13,800 /uL (mild leukocytosis).
Lipase level: 480 U/L (markedly elevated diagnostic marker, reference range 10-60 U/L).
Serum Amylase: 210 U/L (elevated).
Prior Diagnostic Ultrasound Abdomen (01/14/2026): Negative for cholelithiasis or acute cholecystitis.
No evidence of common bile duct dilation.

Assessment & Clinical Diagnoses

1. Acute pancreatitis, unspecified - K85.90 (Primary)
2. Severe epigastric abdominal pain - R10.11
3. Elevated pancreatic enzymes - R74.8

Orders & Treatment Plan

Requested Procedure: CPT 74177 - CT Abdomen and Pelvis with contrast
Clinical Indication: Evaluate for pancreatic necrosis, peripancreatic fluid collections, or pseudocyst in acute pancreatitis.
Supportive IV hydration and pain management initiated.

Electronically Signed by: DAVID MARTINEZ, MD on 01/15/2026 at 11:30 AM EST
